Art Unit: 2817

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Asakawa.

Refer to fig. 5 of Asakawa. A voltage amplification circuit (op amp) is disclosed including an inverting stage G that is DC coupled to an inverting output stage H. Stages G and H may be read as the claimed first and second stages. The presence of previous stages in the reference is not excluded by the claim. Note that the transistors of stage G have dashed lines while those of stage H do not; as stated at col. 5, lines 23-28 of Asakawa this indicates that the threshold voltage of the transistors of stage G are lower than those of stage H and thus the starting input voltage of stage G will be lower than that of stage H meeting the last paragraph of the claim.

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The clamping circuit claimed is not shown by the prior art of record in the context claimed.

Claims 3-9 are allowed for the same reasons already of record.
